

Creature Care - Salt Lake City, UT - and surrounding areas

It can be a very traumatic experience for a pet to be kenneled for several days while you are away. Unless you pay premium prices, a boarded pet gets little time out of the kennel, very little human contact, and has to eat food it is not accustomed to.

Most boarding institutions maintain very strict cleaning policies. However many pets come home smelling like a kennel and some pick up health conditions from being around so many other pets. Many places will not take caged pets at all. If you have multiple pets, Kennels charge for each pet.

The in home services we offer are emotionally and physically better for the pet and emotionally better for you. Creature Care is a less expensive and safer way to provide for the pet members of your family. We feed, water and clean up while you are away. We can also do little things like bringing in the mail and newspaper. We can also leave different lights on each day.

We have 30 years of experience caring for and handling exotic pets. There have been dogs and cats in our homes even longer. Dorian has a degree in zoology. Your pets and your home will be safe while you're out having a great time.
